

THE WORLD OVER

BILLS SENT TO PRIVY COUNCIL

EDMONTON—Decision to carry the fight on constitutional questions and three pieces of legislation to the Privy Council was announced last week by Premier Aberhart.

The appeals will cover the same references as made to the Supreme Court of Canada and upon which judgements were handed down March 4.

SPRIS SENTENCED TO PRISON

LONDON—Three former employees of the big Woolwich Arsenal trapped by the blonds "Miss T" of the counter-espionage service Monday pleaded guilty to charges of smuggling out secret documents. T. S. Gliding, the leader of the spy plot, was sentenced to six years' imprisonment, Albert Williams to four years, and George Whomack to three years.

AIR MAIL SERVICE IN ALBERTA

Trans-Canada aircraft service will commence to operate on a regular daily schedule with a few weeks just as soon as the planes have been tested, and the run will be between Lethbridge and Edmonton, with a possibility that a stop will be made at Calgary en route. This information was given by Hon. C. D. Howe, Federal Minister of Transport.

THREE CONTEST BY-ELECTION

EDMONTON—The number of candidates for the Edmonton East federal by-election was raised to three Monday with the filing of nomination papers for R. C. Marshall, Liberal, shortly before the time for nomination closed.

Previously Orvis A. Kennedy, Social Credit, and Walter W. Clevely, Conservative, filed nomination papers. The by-election, necessitated through the recent death of Dr. W. H. Hall, S. C. member for East Edmonton, will be held on March 21.

LEGISLATION IS CHALLENGED

The Motor Car Supply Company of Canada, with head office at Calgary is seeking a declaration from the Supreme Court of Alberta that the Alberta Social Credit Act, the Licensing of Trades and Businesses Act, 1937, and the Licensing of Trades and Businesses Act made by an order-in-Council, are ultra vires, according to a statement of claim filed at the Calgary Court House Friday.

The attorney-general's department has threatened to take action against the company for having failed to apply for and secure a license under the act.

BARLEY FOR BEER

Although fifteen odd varieties of barley are raised in Canada, there is one variety which is the most important for the breweries, and that is the two-rowed barley. The distinctive requirements of the brewer, the extra-rowed barley, distinguishes good barley for brewing purposes is the ability of the distaste, or soluble ferment of the barley, to transform the starch into dextrin and maltose more completely than an inferior distaste. When the stalk lacks the qualities necessary for the production of the grade of barley demanded, chemical fertilizers are introduced into the soil supply the deficiencies in nature.

C. H. SMITH TO GUIDE DESTINES OF TENNIS CLUB FOR YEAR 1938

Free For Season Set and Membership Committee to be Appointed

The Carbon Lawn Tennis Club held general meeting on Friday, March 11th to organize for the coming season.

The following officers were elected: Honorary-President, B.C. Dewdney; Hon. Vice-President, P.J. Besant; President, C.H. Smith.

Team Captain, Norman E. Nash. Secretary-Treasurer, W.A. Brashers; Executive Committee, President, C.H. Smith; Secretary, with N.E. Nash and Mrs. C.H. Smith.

The drawing up of court rules and the appointing of a caretaker for the courts was left in the hands of the Executive Committee.

It was decided to have a Membership Committee, to consist of one lady and one gentleman, this committee to be appointed by the President.

It was also decided to again affiliate with the Alberta Lawn Tennis Association.

The fees for 1938 were set as follows: Men, \$5.00; Women, \$2.50; and school students, \$1.00.

The balance sheet for the past year showed Receipts of \$155.36 and Expenditures of \$175.47.

LONG YEARS AGO

March 13, 1924

At the first meeting of the new council of the Municipal District of Carbon, held last Thursday, S. N. Wright was chosen Reeve and R. S. Year as Deputy Reeve. The Oldman Kirkpatrick road to be constructed at a cost of approximately \$5,000.

A second long distance wire has been installed in the local telephone system, making it possible to put through two long distance calls simultaneously.

D. F. McKinnon is building a house to be used as residence and police barracks by the local A.P.P.

Mr. Weicker is moving down from Swallow and will open his office opposite the Mayors store. He will deal in the shipment of livestock.

DOES THIS HELP?

Weather permitting, Carbon's football club will hold a practice on the 16th of March.

Broomhall appears to think that unless more consideration is given to the U.S.A. midwest and in Western Canada it is not likely that importers will obtain wheat cheaper than it is today. The surplus remaining in the southern hemisphere is not very large. Canada has little wheat to sell, and the surplus in the United States is not impressive.

STAMPEDE DATES ANNOUNCED

Dates of many stampedes throughout the Province were announced last Friday when delegates of the Alberta Stampede Managers' Association held their annual meeting and luncheon.

Dates include, in the southern zone: Lethbridge, July 4, 5 and 6; Raymond, July 1 and 2; eastern zone: Hussar, May 24; Dorothy, June 1; Gleichen, May 24; Carbon, June 29; Head Hills, July 27; Gem, August 3; Northern zone: Sundre, June 30 and July 1; Carleton Place, July 5 and 6; Calgary, July 11-16; Peace River, July 27, 28 and 29; and Yorkton, August 2 and 3.

ANNUAL BANQUET OF CARBON CURLING CLUB

In the annual President-Vice-President competition of the Carbon Curling Club, the Vice-President's team were the losers and will be hosts to the winners at the Curling Club.

To be held in the Carbon hotel on Friday evening, March 18th, at 7:30 p.m.

The banquet will be a social affair and the ladies will be welcomed at the banquet and the losers promise that they will mark their disappointment at this occasion.

Following the banquet a short program of entertainment, with a presentation of members present the Curling Club will hold their annual meeting at the conclusion of the entertainment.

FARM NEWS LETTER

Seed Selection and Protection

The thrill of spring is in the air and the farmer is busy with the work which brings both profit and enjoyment are now giving heed to the quality of seed.

One of the important factors in the choice of variety suitable from the standpoint of climate, soil and markets. There are usually many varieties bearing local names such as mortgage lifters and the granary filler, yet if one desires a guarantee of genuine seed, the choice must be limited to approved varieties, and the variety must be registered.

Registration of varieties, says G.R. Struthers, is the best method of insuring the quality of Canadian crops. The first crop produced by a farmer from the elite seed is known as "first generation" registered seed.

The first crop produced by a farmer from the elite seed is known as "first generation" registered seed. Naturally, the supply of the first generation seed is limited to what is sold by the chief commercial source of seed ready to type starts with the second generation crop. Experimental station officials or agricultural representatives can help the grower in the choice of varieties.

The necessity for a liberal use of the fanning mill has long been recognized by most farmers, though many still neglect the equally important choice of treating the seed for control of those seed-borne diseases which definitely impair the quality of the crop. Covered seeds of barley and wheat, the smuts and oats and numerous root-rot can now be controlled effectively by the use of an ethyl mercury phosphate dust, and the treatment can be carried out before the rush of spring work begins.

While laying the foundation for better seed consideration must be given to the farmer to reduce some of the risks that beset a growing crop. First, there is the danger of the crop lodging, this may be due to a number of causes, but prominent among them is the low level of minerals in the soil. Rust is another cause of much loss, and for this there is no positive means of prevention except the development of resistant strains or varieties. Both of these risks can be reduced, however, by the liberal application at seedling of a high phosphate fertilizer containing Lanthan nitrate. The mineral Lanthan thereby tend to strengthen the straw, increase disease resistance and hasten the crop to maturity before the yield is perceptibly diminished.

The thought has often been voiced that a field of wheat which is one of the most wonderful sights in the world. This is scarcely less true of any other crop of uniform stand and maturity such as can be produced from pure seed that is true to type and free of disease. Cereals raised from such seed bring greater commercial returns and add to the grower's pride in the produce of his fields.

ADOLF HITLER TAKES OVER AUSTRIAN NATIONAL FOR NAZI GERMANY

Austria Ceases to Be Categorized as One of World Nations

Austria has submitted to Adolf Hitler. The government yielded to Germany's armed might and gave up its five-year fight against domination by the German father.

Major Klausner, leader of the Nazi storm troops in Vienna broadcast the announcement that Austria had become free and a new government had been formed.

The anti-Nazi Chancellor, Kurt von Schuschnigg, resigned Friday night in the face of a German ultimatum demanding recognition of the government. Immediately German troops moved towards Vienna and when they entered the capital, the thought of Austria bloodshed the Austrian army was given orders to offer no resistance.

Thus Austria ceased to be a nation and was taken over by the German government. The end of the political freedom of ancient Austria was achieved by the German government.

Arthur Seles-Inquart, the Hitler-chosen chancellor, has taken charge of the government and is now consolidating authority provided for such an emergency and announced decrees legislation Austria out of existence.

France Prepares for Worst
In Paris it was reported that France considered means to strengthen the treaty with Czechoslovakia to guard against the possibility of any further part of Germany to push her quest of colonies into that country.

England is no definite decision so far been made on that country's action although the feeling is that should France be called upon to defend Czechoslovakia that Britain will aid in the struggle. In the meantime war preparations are being continued on an even larger scale and England is preparing for the worst.

THE WORLD OF WHEAT

REVIEWED WEEKLY BY

MAJOR H.J. STRANGE

"Thatcher is now recognized as equal in milling value to Marquis and is acceptable for the grade No. 1 Northern."

The top good news received from Great Britain where large scale tests on the milling of Thatcher—the new multi-resistant wheat—were arranged to be made by the Board of Grain Commissioners.

Farmers who operate in the rust areas, and who expect to seed some five million acres with Thatcher this spring, will be glad. The Government who have encouraged the use of Thatcher will be happy to hear the "Crop Testing Plan" particularly will be relieved, for about half of all the Thatcher to be seeded this spring comes from the stocks the "Crop Testing Plan" brought in from Minnesota two years ago.

It all means that Thatcher will continue to increase the income of Prairie farmers in the rust areas of Manitoba and Saskatchewan, and besides will do no harm to the reputation of Marquis and other high-quality wheats on world markets.

Thatcher is not a perfect rust-resistant wheat, but it is an excellent "stop-gap" until the plant breeders of the Dominion Experimental Farms, the Universities and the Rust Research Laboratory can produce something better; which will certainly cost about 1 for one believe, in a few years.

Following farmers have tended to raise prices:
Grasshopper damage to corn in Argentina is widespread. South America harvested smaller wheat crop in years. China buys Australian flour. Germany buys over a million bushels of wheat from Rumania. Mexico buys American wheat. Rumanian officials estimate of corn crop is 35 million bushels below last year.

Following farmers have tended to lower prices:
U.S. winter wheat crop estimates are thirty million bushels below last year. Preliminary estimates, 1937-38 Australian wheat yields surpass all German. Greater areas sown to winter wheat, rye and barley in Germany than previous year. Indian and European wheat crop prospects very favorable.

Mrs. C. Friesen left on Tuesday on a business trip to Edmonton.

WORCESTER, England—Here's a weighty outcome the Royal and Ancient Golf Club was asked to fix the score on. On the course here the ball lodged in the folds of a wet bag and when this was unfolded the ball rolled into the hole.

CARBON STAMPEDE JUNE 29

According to an announcement made in Calgary last Friday, the date of the Carbon Stampede as set by the Alberta Stampede Association, will be Wednesday, June 29th.

Many of the local citizens were of the opinion last year that the Stampede should be dropped for a time, owing to the fact that conditions do not warrant the staging of such an expensive attraction, and especially so when the Carbon Stampede showed a large deficit last year.

No doubt a meeting will be called shortly to discuss the situation.

SPRING IS ON ITS WAY WEATHER WARMS UP

With the snow rapidly melting under the warm rays of the March sun and the gentle western breezes blowing across the prairie, the thoughts of Albertans are turning to spring. So much so, in fact, that cat catches have been thumbed by the optimistic gardeners and plans have been made for 1938's crops.

During the past week the weather has been mild and the snow is rapidly melting. The gardeners and the creek is at a high level, being almost sure signs that spring is here and we may expect warmer weather.

Many farmers have completed the cleaning and treating of their seed and are now repairing and putting their machinery in shape for spring work. While it will be at least a month yet before spring work on the land will start, there is an optimistic feeling among the farmers and with improved moisture conditions the prospects for a crop are bright this year.

Another heavy snowfall about the end of the month would furnish ample moisture for complete germination of all crops this spring.

MCCORMICK DEERING SHOW WELL-ATTENDED MONDAY

The McCormick Deering show held in the Farmers' Exchange hall at Carbon on Monday afternoon, March 15, was well attended and a number of interesting and entertaining features were shown. Program trouble occurred in the show and those responsible for the sudden ending of the pictures, although most of the interesting features were shown and those attending were well repaid for the time spent in attending.

New automobile license plates will be purchasable for the year 1938-39 on March 28th and after.

VILLAGE COUNCIL SETS RATE OF 13 MILLS FOR GENERAL PURPOSES

Supplementary Tax on Village Lots To Be 5 1/2 Mills

The regular monthly meeting of the Council of the Village of Carbon was held in the Secretary's office on Monday, March 14th and general business was conducted.

Estimates for the coming year were prepared and accepted by the council. In order to provide the necessary revenue for the year 1938 a rate of 13 mills was set by the council for general purposes and business tax supplementary tax of 5 1/2 mills on the dollar was set on all lots within the Village.

By-Law No. 59 which was given first reading at February's meeting had a clause deleted and the amended by-law was given first reading.

The new business tax was approved and on figuring up several business taxes it was shown that some taxes would vary a little, but that the total change from the 1937 level. This business tax was accepted by the council as being fair to all.

By-Law No. 59 was given second reading before the close of the meeting.

ST. PATRICK'S PARTY AT DOWNEY HOME FRIDAY

The Misses Elaine Torrance and Lorraine Downey entertained a number of their young friends at the latter's home on Friday, March 11th. The party took the form of a St. Patrick's celebration and the evening was spent in playing cards, contests and dancing. Prize winners at cards were Martha Rogers and Francis Paxon. In the contests, Marjorie Leitch, Hugh Cameron, Isabella Goulfe and Harvey Barker were the winners. The young hostesses served their guests with a delectable lunch, with the help of Mrs. S.P. Torrance, Mrs. L. Paxon and Mrs. B.C. Downey.

Near Approach to Earth Of A Small Planet Brings Some Interesting Comment

Not long ago a planet passed close to the earth, and we give the comments of the Astronomer Royal, Dr. Spencer Jones, on the subject:

A small planet certainly made a close approach to the earth, but when I speak of a close approach I am thinking in terms of astronomical distances.

It is rare of any celestial body to come within a few million miles of the earth and this small planet passed us at a distance of some four hundred thousand miles, which is much the closest approach of any known celestial body. This occurrence has given rise, perhaps not surprisingly, to some conjecture as to what might have happened if it had actually collided with the earth.

Nearly 30 years ago a much smaller body—a large meteor—struck the earth in a remote part of Siberia. Eye-witnesses of the fall told of the appearance of a mighty darkness much brighter than the sun, giving off great heat, and of a violent explosion followed by a tremendous concussion, like an explosion which lasted for several minutes. The meteor fell in a thickly settled region and within a few minutes to a distance of about 20 miles, were blown down by the blast of wind which the meteor, as it fell, had stripped of their bark, and most of their branches had been scorched by the fiery blast. They had all fallen upwards so that when the meteor struck there was a strange fan-like appearance. More than one thousand people were killed.

Some thousands of years ago a much larger meteor, or possibly a comet, struck the earth in Arizona, as may still be seen in Arizona as a vast cup-shaped hole with a raised rim, about one mile in diameter and 600 feet deep. This meteorite is estimated to have weighed about one million tons. When it fell it bore with it very through the earth, creating a great heat, generating terrific heat and a vast quantity of steam, which shot out again with explosive violence. History does not record what the effects of the explosion were, but by comparison with the Siberian meteorite we can believe that serious destruction must have been caused at distances of one or two hundred miles.

The planet that recently passed near the earth was probably no more than a mile in diameter and may be estimated to weigh no more than one thousand million tons. This exceeds that of the Arizona meteorite by as many times as that exceeded the Siberian meteorite.

So by a comparison of the results of these impacts we can get a rough idea of what would have happened if this planet were to collide with the earth. It would probably form a great hole in the earth's surface, perhaps 50 miles across and a mile deep, resembling the larger mountain craters on the moon. The debris within this area would be complete, and all visible landmarks would disappear.

The explosive blast of scorching air, like that from an intensely hot furnace, would carry destruction far and wide, and would be felt the whole world over. If it fell in the middle of one of the oceans, gigantic waves would carry destruction far and wide. The escape that the earth had on this occasion may be compared with that of a six-inch target which was missed by 25 feet. A pretty bad show, we should say.

And the chances that the earth will actually be hit by such a planet are not extremely small that we may disregard them and consider that there is no chance of such a disaster. There is a collision as merely idle, though perhaps not uninteresting speculation.—B.B.C. Letter.

Chinese Problem
General Chiang Kai-Shek told Vernon Bartlett, well-known British journalist, he "could not conceive of British recognition of Manchukuo," and that such recognition would be "a betrayal, according to Sino-British friendship," according to a special interview published by the London News Chronicle. A country as large as China cannot rapidly be mobilized, Chiang said, dealing with internal problems.

A Giant Furze
Ambitious countries in Germany, Italy and Japan should take note of the fact that Harvard University has a furnace that can register 4,800 degrees of heat. This is the nearest to a place in the sun you can reach in this cold world, says the Toronto Star.

Nearly 50,000,000 people in Japan now have postal savings accounts.

THE KING AND QUEEN AT THE R.L.P.

Their Majesties the King and Queen during their tour of the British Industries Fair at Olympia between intensively in a display of playing cards dating back to 1840.

Talking Newspaper

New Sound Device That Vocalizes The News Of The Day
A new method for producing a talking-newspaper was reported in "Editor and Publisher," journalistic trade magazine. The device, by which a sound-track can be produced on ordinary newspaper and the human voice reproduced from the track by means of an inexpensive machine in the home, was invented by W. G. H. Finch of New York.

The invention not only promises to be useful for children too young to read, and for illiterates and blind persons, but also holds the seed of a revolutionary change in the newspaper industry, according to "Editor and Publisher."

Mr. Finch said a newspaper could be produced for \$1,000 or \$1,500 a week by means of a new sound-track recording machine which would produce the visible sound track. The track is simply a miniature of the picture produced in an ocellograph by talking into it. In other words, the wave line made by a pen actuated by sound impulses. From the visible sound track, a plate would be made to be inserted into the regular newspaper maker.

The sound would be reproduced by means of a reproducer which, Mr. Finch said, could be manufactured for as low as 25 cents apiece, providing volume production was great enough. The producer, measuring about nine inches long and five inches square, includes scanning equipment made up of a light source to be focused upon the printed sound track and a photo-electric cell sensitive to the varying light intensities refracted from a record, or newspaper. A preamplifier is associated with the photo-electric cell to amplify electrical signals generated by the cell. The output of the preamplifier is amplified further by a control reproducer with any radio loud-speaker, through a patented device.

A white man—a sea captain of Nome, Alaska—crossing Bering Strait on the ice dog sled, showing that America's early natives could have come from Siberia that way in prehistoric times, even without boats.

Lacy Crochet Flatters Its Wearer

There's a lacy alternative in this dainty crocheted blouse, right for a variety of occasions. Simply crochet it 'round and round, thus doing away with the need for a collar. The blouse is plain, simple, while an oh-so-easy open stitch forms the pretty curving yoke and sleeve that gather into cuffs. The skirt is flared and in a plain stitch. Pattern 5642 contains instructions for making the blouse in sizes 16-18 and 38-40; an illustration of it and of stitches; material requirements; and price. Pattern 5643 contains instructions for making the skirt in sizes 16-18 and 38-40; an illustration of it and of stitches; material requirements; and price.

To obtain these patterns send 20 cents each (40 cents for both) in coins (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Co., 175 McDermott Ave., E., Winnipeg.

Modern Mining Plant Near Arctic Circle Is Responsible For Canada's Radium Supply

Could Teach Scientists

Which Doctors Of Gold Cost Still Have Secrets
Dr. Cicely Williams, one of the pioneer women doctors who, nine years ago, went to work on the Gold Coast, once "The White Man's Grave," led the attack of science on the mine the company has since that black mystery men can still give tips to western medicine.

After working among them, seeing as much as they would allow of the strange cures which have been handed down for centuries from one witch doctor to the next, Dr. Williams feels there is something in this "witchcraft."

"Some of their cures are genuine and convincing; they undoubtedly have some effective treatment for tetanus," she says.

Western medicine has no treatment which doctors would care to describe as effective.

Dr. Williams describes the witch doctors' methods as "complicated" but adds that they would "repay investigation."

Writing in the *Lancet* of the natives, she says:

"The African male is much addicted to the habit of sitting in the shade and playing wari, discussing the day's manufacturing political or litigious transactions. He is content to see his fellow folk feverishly overworked on his farm or to pay wages to alien laborers."

"A wife is an investment. One costs about \$50. She works for her husband as a cook, cultivates his farm, engages in petty trading, and when there are children she goes home to mother, who brings them up."

Lawyer May Win Millions

Takes Advantage Of Obscure Law Regarding Unclaimed Money
A Philadelphia lawyer stands to inherit \$1,000,000 if all the unclaimed money he has reported to the state finally reaches the Pennsylvania treasury and his claim is approved by the courts.

A Dauphin County judge issued a ruling in favor of the lawyer, Michael E. Edelman, under a law providing that an informer who reports unclaimed money and prosecutes and proves his case is entitled to one-fourth of the amounts that revert to the commonwealth.

Edelman died with the court a list of corporations which hold dividends declared but unpaid, matured bonds on debts which had not been paid because the owners are unknown, funds owing to unknown persons, unclaimed stock and cash. His records which have not been before his list is totally gone.

"I can do it! I will do it!" vowed Edelman four years ago and a great deal of money gathering the information.

Demand For Canadian Eggs

Experimental Shipments To Britain Meet With Great Success
Canadian exporters have launched a successful challenge to Denmark's long-standing domination of the British egg market.

Experimental shipments of Canadian eggs, sponsored by the Dominion department of agriculture and co-operative organizations, have met with such success that steps have been taken to establish the scheme on a permanent basis.

Direct negotiations for a regular and increased supply have already been opened between a leading firm of London importers and Quebec authorities.

Prefers Scarlet Tunic

Bright Uniform Inspiring Opinion Of Boy War Veteran
The old-style brilliantly-colored army uniform, replacing khaki, was created by Dr. Joseph H. Hartley (Toronto) to enlist with the Royal Canadian Regiment for service in the Battle of France.

Toronto to more than 50 Boy War veterans, at the 38th anniversary of the Battle of France, in South Africa, Dr. Jordan, president of the South African Veterans' Association, pointed out that the pre-war red-coated warriors had a much stouter appearance, and were much more pleasant to watch while on parade.

The present-day khaki uniforms, he told, were drab and not much of an inspiration to the younger generations. Khaki should be used only in time of war, he added.

A manufacturer of toy trains made money in 1937 with an appreciable increase in production. The property of Eldorado Gold Mines, Limited, at Great Bear Lake, Northwest Territories.

The all-Canadian program announced at the beginning of the year has been virtually completed, and consequent on increased output at the mine the company is enlarging the capacity of its refinery at Port Hope, Ontario. Including the rational laboratory proper, five new buildings have been erected, and the new facilities at the refinery will make possible a capacity triple that of the previous plant, and also make provision for new products not yet included in Eldorado's growing radium-uranium-silver-lead-copper production list. The uranium products are widely used in ceramic and other industries and a record demand is being experienced for them.

Development work at the mine includes 8,000-foot underground advance, and construction of several buildings. The mine has been leased to the Canadian Radium Corp. by the federal government, the oil for fuel being obtained from the wells at Norman. Installation of this, also, is under way.

The equipment at the mine includes a 70,000-gallon tank for fuel oil, a chemical laboratory, a new assay office, and a new radium laboratory. For the No. 2 or gulch shaft, the construction work included an electric transmission line, a new road, and a new power house, blacksmith shop, headframe and other necessary buildings.

The discovery of pitchblende and silver ore by Gilbert Labine at a point to the northwest of Echo Bay, Great Bear Lake, Northwest Territories, in 1924, opened one of the most romantic veins in the history of mineral exploration. Considering the fact that the mine is only 40 miles south of the Arctic Circle, the establishment of a modern mining plant capable of handling 100 tons of ore a day and permanently employing more than 100 men, is a remarkable achievement.

Confident Of Success

Young Singer Fights Himself For Victory Over The Night Gies
A 22-year-old Philadelphia singer, reconciled to the fact that he soon will be blind, has embarked on a determined career to become a star before his sight is totally gone.

"I can do it! I will do it!" vowed Hartley four years ago and a great deal of money gathering the information.

Household Arts by Alice Brooks

It's Crocheted 'Round and 'Round Without a Seam

Direct negotiations for a regular and increased supply have already been opened between a leading firm of London importers and Quebec authorities.

It was originally intended to carry on the experimental shipment for a period of eight weeks only, each shipment consisting of 50 cases of 150 eggs. The demand was so keen for the Canadian product that the supply was quickly exhausted.

A member of the importing firm of John London declared there was no doubt Canadian eggs were fresher than those from other countries were, better packed and handled, thus commanding higher prices.

Gels Plenty of Exercise

Fred Lamb, a watchman for 15 years with Waterloo, Limited, is the "kingmaker" in his home in Bradford, England. He has never had a vacation since he started the job, and travelling a distance of 15 miles per night about the plant according to his computation, he has gone 103,740 miles in the 15 years.

In Vienna girls are undergoing training for employment as domestic servants in Great Britain.

A manufacturer of toy trains made money in 1937 with an appreciable increase in production. The property of Eldorado Gold Mines, Limited, at Great Bear Lake, Northwest Territories.

The all-Canadian program announced at the beginning of the year has been virtually completed, and consequent on increased output at the mine the company is enlarging the capacity of its refinery at Port Hope, Ontario. Including the rational laboratory proper, five new buildings have been erected, and the new facilities at the refinery will make possible a capacity triple that of the previous plant, and also make provision for new products not yet included in Eldorado's growing radium-uranium-silver-lead-copper production list. Bright Uniform Inspiring Opinion Of Boy War Veteran
The old-style brilliantly-colored army uniform, replacing khaki, was created by Dr. Joseph H. Hartley (Toronto) to enlist with the Royal Canadian Regiment for service in the Battle of France.

Toronto to more than 50 Boy War veterans, at the 38th anniversary of the Battle of France, in South Africa, Dr. Jordan, president of the South African Veterans' Association, pointed out that the pre-war red-coated warriors had a much stouter appearance, and were much more pleasant to watch while on parade.

The present-day khaki uniforms, he told, were drab and not much of an inspiration to the younger generations. Khaki should be used only in time of war, he added.

A manufacturer of toy trains made money in 1937 with an appreciable increase in production. The property of Eldorado Gold Mines, Limited, at Great Bear Lake, Northwest Territories.

The all-Canadian program announced at the beginning of the year has been virtually completed, and consequent on increased output at the mine the company is enlarging the capacity of its refinery at Port Hope, Ontario. Including the rational laboratory proper, five new buildings have been erected, and the new facilities at the refinery will make possible a capacity triple that of the previous plant, and also make provision for new products not yet included in Eldorado's growing radium-uranium-silver-lead-copper production list. The uranium products are widely used in ceramic and other industries and a record demand is being experienced for them.

Development work at the mine includes 8,000-foot underground advance, and construction of several buildings. The mine has been leased to the Canadian Radium Corp. by the federal government, the oil for fuel being obtained from the wells at Norman. Installation of this, also, is under way.

The equipment at the mine includes a 70,000-gallon tank for fuel oil, a chemical laboratory, a new assay office, and a new radium laboratory. For the No. 2 or gulch shaft, the construction work included an electric transmission line, a new road, and a new power house, blacksmith shop, headframe and other necessary buildings.

The discovery of pitchblende and silver ore by Gilbert Labine at a point to the northwest of Echo Bay, Great Bear Lake, Northwest Territories, in 1924, opened one of the most romantic veins in the history of mineral exploration. Considering the fact that the mine is only 40 miles south of the Arctic Circle, the establishment of a modern mining plant capable of handling 100 tons of ore a day and permanently employing more than 100 men, is a remarkable achievement.

WORLD HAPPENINGS BRIEFLY TOLD

Japan and the United States are reported to have reached an amicable solution over Japanese fishing in Alaskan waters.

Premier Angus Macdonald announced in the Nova Scotia Legislature that the fiscal year ending Nov. 30, 1937.

Quebec province will be given a new industry with the construction at Rouen, Que. within the next few months of a \$800,000 sulphur plant, the mines department announced.

The United States and Czechoslovakia signed a trade agreement, the 17th the U.S. has concluded. The pact calls for tariff reductions by both countries on groups of products. Air France, the French national air line, plans to use a seaplane and glider landplane for experimental flights across the North Atlantic starting in June.

Peter Sinclair, 50, Liberal House of Commons member for Queens, P.E.I., died in hospital of a heart attack. The Queen's coroner has elected to the house in the general election of 1935.

Louis A. Johnson, U.S. assistant secretary of war, said in an interview the United States army has perfected an automatic landing device which eliminates the danger of fog at airports.

Paul Vincent Carroll, a \$37,500-a-week school teacher in the village of Glasgow, arrived in New York to see the Broadway stage hit which nets him \$890 a week after tax deductions.

Col. O. M. Biggar, Ottawa lawyer, has been appointed to draft legislation to amend the Criminal Code, against electoral corruption, it was reported. Col. Biggar was former chief electoral officer for the Dominion.

The Greatest Gift

Is Enabling Every Person To Do Something For Himself

No man, no honest man, wants nothing. A fair chance to help himself is all he asks. If blind or deaf or crippled, still for himself he seeks no more. The greatest gift one person can give another, Helen Keller has said over and over, is not to do something for him, but to enable him to do something for himself.

A case in point is Miss Keller herself, to men everywhere the symbol of a fruitful life grown from a blighted blossom... through patient nurture by a friend. Miss Keller, the 34th anniversary of Miss Keller's first meeting with her teacher, was observed as National Helen Keller Day, is aid of the blind. Give and receive club groups, which, on many fronts are doing much to help the blind and incapacitated, may remember this word from her: "The heaviest burden on the blind is not blindness, but silence." *Rotarian Magazine.*

Had Wrong Idea

Farmer Did Not Quite Understand Remark Of Minister

The new minister was extremely enthusiastic about foreign missions and one of his first well-aimed tasks upon coming to the parish was to call upon all of his neighbors whom he knew to have money and enlist their support.

"I'm sorry," replied one wealthy farmer, "but it's no use asking me. I don't approve of foreign missions."

"But surely," the minister persisted, "you know that we are commanded to feed the hungry?"

"That may be," came the grim reply, "but surely we are commanded to feed the hungry?"

"That may be," came the grim reply, "but surely we are commanded to feed the hungry?"

"That may be," came the grim reply, "but surely we are commanded to feed the hungry?"

FLIN FLON

"The Story of Its Finding and Position To-day"

By PRATT KUHN

While at Island Falls I found that Jeff Horn-Hav was coming back to go up to Rocky Falls on Reinder Lake. Another 60 miles away, so I went there, as men and supplies were being down from Island Falls to erect cribbing barge trains restraining the water from Reinder Lake (which is a mere 15 miles long, 40 miles wide, but averaging five miles in some places 800 feet deep and an area of 2,500 square miles) from rushing down Reinder River into the Churchill and thus to the power plant at Island Falls.

About 40 men were on the job just starting. They and their machinery and supplies had all been flown in and the engineer in charge was O. L. Plamondon of Toronto for the Fraser River Co.

Here I met the famous flying trapper of the early days, Del Simons, who now lives at Island Falls with his family. He is in charge of crusing and is a magnificent man, 300 odd pounds and about six feet tall.

Six miles from Rocky Falls there's still a Hudson Bay Post on an island, and for trading is carried on with the Indians and trappers.

I asked the cook because I told him that he had to do now was wash water, tea or coffee and wash up. This is literally true, because here's the food brought in by his supply train, and they're all of the best.

Fogs Are Expensive

The Ice Cream Province

People In Ontario Appear To Be Fond Of Product

Ontario, it seems, is the ice cream province of Canada. Her people eat, on the average, a gallon each year in addition to what is made for them "on the spot" in homes, and also in ice cream parlors, restaurants and hotels which make their own supply. Ontario's gallon (the 1926 figure) compares with a gallon and a half which the average resident of the province stored away in the ice cream days of the late '20s. It compares with only two-fifths of a gallon per capita in Quebec and a Canadian average of two-thirds of a gallon.

Canada in 1925 produced 5,600,000 gallons; in 1929, 8,900,000. By 1933, the worst depression year, production had fallen again to 5,700,000. Since then it has climbed steadily to 7,600,000 gallons in 1936. The value was \$6,600,000, compared with \$13,600,000 in the peak year.

In 1936 nearly 50 per cent. of the total gallonage of ice cream produced in Canada was made in Ontario—Toronto Star.

A Good Marksman

St. Ford Of Edmonton Wins Shield For Making Perfect Score

Dominion Marksmen Association officials announced Aug. 24 that St. Ford, a 28-year-old Canadian Mountie, had won the coveted expert shield with a perfect score of 4,000 out of a possible 4,000 points with a .22 sporting rifle.

Sergeant Ford, former official broncho-buster for western detachments of the R.C.M.P., fired 200 consecutive shots from a standing position on a 20-yard range, then repeated his perfect score from sitting and prone positions. Ford is a former winner of the individual high score trophy in the Dominion Marksmen R.C.M.P. revolver competition.

SUNDAY SCHOOL LESSON

MARCH 29

KEEPING THE BODY STRONG

Golden text: Now therefore be ye strong, I pray thee, and drink no wine nor strong drink and eat not any unclean thing. Judges 13:4

Lesson: Mark 6:53-56; Judges 13:4; 1 Corinthians 3:16; Romans 12:1, 2

Devotional reading: 1 John 2:12-17.

Explanations And Comments

Jesus Ministers to the Health of the Body. Mark 6:53-56. From the plain on the north-eastern side of the Sea of Galilee, Jesus and his disciples had crossed over in their boat to the plain of Gennesareth south of Capernaum. Here, the eagerness of the people for healing detained him for some time. They came to him from all regions round about, bringing the sick on their beds to be healed. Wherever he went it was always the same, whether in cities or villages or country, the sick were laid down in the market-places and the people pressed forward to touch even the border of his garment and be healed.

A Very Strong Argument for Temperance. 1 Corinthians 3:16, 17. Christians are to be strong in the Lord. If any man destroyeth the temple of God, his shall God destroy. The temple of God is holy, and such are ye. While the body is the better reason for temperance than is rooted in this brief passage? It is a tremendous thing, that our body is a temple of the living God, and that the Spirit of God dwelleth in us. If any man destroyeth the temple of God, his shall God destroy. The temple of God is holy, and such are ye. While the body is the better reason for temperance than is rooted in this brief passage? It is a tremendous thing, that our body is a temple of the living God, and that the Spirit of God dwelleth in us. If any man destroyeth the temple of God, his shall God destroy. The temple of God is holy, and such are ye. While the body is the better reason for temperance than is rooted in this brief passage? It is a tremendous thing, that our body is a temple of the living God, and that the Spirit of God dwelleth in us. If any man destroyeth the temple of God, his shall God destroy. VON RIBBENTROP CONFERS WITH VISCOUNT HALIFAX

LONDON.—Shouting crowds taunted Joachim Von Ribbentrop, Germany's new foreign minister, as he sought means of a settlement with Great Britain in the face of increasing European unrest.

Von Ribbentrop and Viscount Halifax, British foreign secretary, conferred at the foreign office for more than two hours.

What the former ambassador to London and the peer discussed was concealed behind diplomatic secrecy.

Reliable sources, however, said the conference was inconclusive.

Von Ribbentrop, these sources declared, declined to commit his government without further instructions from Chancellor Hitler.

The British government, at whose request Von Ribbentrop was said to have conferred at this time, apparently was convinced, these sources said, that the moment was not ripe for going on with negotiations.

Germany's request for recognition of her right to colonies, and swift developments across the English channel, possibly gave the conversation a wide scope.

To these obstacles was added a broad gap between the outlooks of Germany and Britain on fundamental issues.

Although informal persons emphasized the foreign minister's talk was "exploratory," they said an apparent deadlock on the colonial question made an early agreement improbable.

Britain and France, which hold League of Nations mandates over most of Germany's former colonies, are understood to insist the colonial question be coupled with a general European appeasement.

As the German foreign minister stepped from his car at the ambassador's entrance to the foreign office, he raised his hat and smiled. "Ribbentrop get out?" came the hostile shout from the assembled crowd.

For 2½ hours Von Ribbentrop talked over Anglo-German problems with Foreign Secretary Viscount Halifax. For 2½ hours the two waited along the approaches, increasing in numbers as the time went on. Then, as Von Ribbentrop emerged, the crowd again shouted: "Ribbentrop get out?" the demonstrators, mostly young men, evidently were shouting at a pre-arranged signal.

Not in the worst days of cabinet crisis has Downing street seen so many police. They stood at every point of possible attack. Reinforcements stood under the archways. More waited in the courtyard. A police car preceded Von Ribbentrop as he drove back to the German embassy.

During his talk with Lord Halifax the crowd outside swelled from the 30 who had greeted Von Ribbentrop on his arrival, who cheered and shouted the Communist flag, to almost 100 at his home.

Von Ribbentrop has reported to have stressed the German view that Chancellor Hitler, as head of state, should be spared from domestic criticism. Lord Halifax, while ready to urge restraint on the press, holds that criticisms of Hitler's actions are justified, since he is also in the position of a premier at the head of a government.

Investigate C.B.C.

Governors of C.B.C. To Be Questioned Regarding Activities

Ottawa.—Governors of the Canadian Broadcasting Corporation will be called before the select committee of the House of Commons investigating activities of the corporation. It was decided as the committee, meeting for organization, elected Arthur J. Beaudin (lab., Freeholder) chairman.

The governors, who will be in Ottawa for the annual meeting of the corporation March 21 and 22, will be called before the general manager, Gladstone Murray, and other officials are called for examination.

It was agreed, committee members may submit written questions to the chairman for submission to officials of the corporation, and they will bring to the committee the information required to answer them.

Winipeg Financial Affairs

Winipeg.—Four hundred representatives of Winipeg business largest delegation ever to appear before the Manitoba legislature, pleaded to the provincial government and the city to speed up negotiations for settlement of Winipeg's relief emergency. Chief request was for an independent commission to investigate financial affairs of Winipeg.

Dispute Over Islands

Britain and United States May Submit Matter To Arbitration

LONDON.—British diplomatic sources, commenting on Prime Minister Chamberlain's statement in the House of Commons that Great Britain could not recognize the United States government's claim to the Santa Barbara Islands of Canton and Endbury, declared London would propose joint sovereignty over the disputed territory.

If the United States turns this down, they said, Britain will suggest arbitration, but whatever the solution, it must take in both powers' requirements for neoprene landing facilities on the islands, according to well-informed opinion.

Mr. Chamberlain, answering Conservative and opposition questions, said:

"His Majesty's government maintain all their rights to the Phoenix group of islands. Last year the United States government contested the validity of the British claim to the Phoenix group of islands, which Canton and Endbury are situated, and declined to recognize the order-in-council of March 18, 1927."

"Sir Ronald Lindsay (ambassador to Washington) has been instructed to inform the United States government that His Majesty's government in the United Kingdom cannot accept the jurisdiction situation as in any way affected by their recent action, which included landing on Santa Barbara Island."

"This island has been effectively occupied by His Majesty's government, on August 1927, and an administrative officer now resides there. He (Sir Ronald) is instructed to say that His Majesty's government maintain all their rights to the Phoenix group."

"It is intended in the immediate future to submit the dispute to the United States government which it is hoped will serve as a basis for ending this controversy in a manner satisfactory to both parties."

"His Majesty's government are understood to insist the colonial question be coupled with a general European appeasement."

As the German foreign minister stepped from his car at the ambassador's entrance to the foreign office, he raised his hat and smiled. "Ribbentrop get out?" came the hostile shout from the assembled crowd.

Recommends Vast Park

President Roosevelt Would Negotiate With Canada For Land

Washington.—President Roosevelt said at his press conference he had forwarded to the United States state department a report of the Quebec superior committee, recommending creation of a vast wilderness park in Minnesota and Ontario.

The report proposed federal acquisition of lands in Ontario, Canada, and negotiation of a treaty with Canada regarding the Canadian side of the proposed 100,000-acre park embracing the Rainy lake and Pigeon river watersheds on the Canadian border. It estimated \$12,500,000 would be required to purchase necessary land.

BRITISH LABOR PARTY CONDEMNS MOSCOW TRIALS

LONDON.—The Independent Labor party—which holds the left wing of the British labor movement—has issued a statement condemning the Moscow trials.

In a cheering House of Commons, Prime Minister Chamberlain declared the United Kingdom had not been "duped" by the Soviet government's agreement with the Soviet government: not to mobilize in British espionage.

Testimony as to British espionage brought out in the Soviet trial was "totally untrue," he said, adding he doubted they would be given any credit "in this country or, indeed, anywhere outside the Soviet Union."

"The very nature of the confessions," declares a bluntly worded statement handed Russian Ambassador Ivan Maisky, "the manner and technique of the trials and their preparation, and the incredible character of the alleged crimes not only fail to convince, they have an opposite effect."

"This is not working class justice. It is barbarous justice. It is an insult and injury to all international working class ideals and interests. It is not the prisoners who have been on trial in Moscow. It is the system of bureaucracy which has grown up since the time of Lenin."

"We know that in Britain the executions by firing squads and the suicides have been possible to the army working class opinion on behalf of the U.S.S.R. and to strengthen immeasurably the hands of the Chamberlain and the Halifax in their moves to isolate the Soviet Union."

"In the name of the victory and will of the workers of all lands we call upon you to stop these trials and killings, to empty Soviet prisons of workers more languishing in iron and restore the U.S.S.R. to its rightful place—the vanguard of human civilization towards a free, classless society and to the better day of socialism."

Peer Leaves Labor Party

LONDON.—Lord Sanderson, labor peer, resigned from the Labor party, declaring that the British Labor government would be a "menace to peace." His resignation followed by a week that Lord Amable, paymaster-general in the Labor government.

At 800 feet the planes parked. Mail brought and messages sent. Each craft banked in opposite directions and an accompanying plane was left far behind when Mercury showed her speed.

Consent Not Necessary

Donations Not Consulted In Regard To Anglo-Italian Negotiations

LONDON.—Prime Minister Chamberlain did not reply when asked in the House of Commons to supply copies of telegrams and replies exchanged with the Dominion governments in regard to Anglo-Italian negotiations.

Arthur Jenkins, Conservative, at question time in the house contended Mr. Chamberlain indicated in connection with the Rome negotiations that the consent of the Dominions was not necessary until they were called on to undertake active obligations. 2246

RESISTS NAZIS

Campaign of Nazis to gain political control of Austria was threatened when Major Emil Fey, former leader of the Heimwehr, called on the once powerful military units to fight for Austrian independence.

Fey said he would place a reorganized Heimwehr at the disposal of the Chancellor, declaring he could mobilize some 30,000 men in two days.

British Cabinet Changes

Minor Reorganization To Free Viscount Halifax Of Other Duties

LONDON.—Prime Minister Chamberlain put through a minor reorganization of the cabinet to free Viscount Halifax of other duties so he may concentrate on foreign affairs.

Unexpectedly the Prime Minister brought Lord Maitland into the cabinet. The 72-year-old former lord of appeal became lord chancellor and speaker of the house of lords.

Mr. Maitland, Viscount Halifax, appointed lord president of the council, the post formerly held by Lord Halifax. Another of Lord Halifax's tasks was transferred to other shoulders, Earl Stanhope becoming government leader in the house of lords while remaining president of the board of education.

The series of changes resulted from Anthony Eden's resignation as foreign secretary and Lord Halifax's appointment to succeed him.

"The house of lords representation in the cabinet was increased from six to seven."

Lord Maitland becomes "keeper of the king's conscience" and chief legal position as head of the judiciary after a career devoted to the law.

Attacked By Whales

Victor, an acknowledged Irish fisherman got the fright of his life when his boat was pelted by two whales.

The fisherman, who had been added up to the small boat, and bumped it around with their powerful tails. The fisherman headed for shore as fast as he could row. The whales followed. One of the monsters grounded when it swam too close to shore, but wiggled free as the Italian scrambled ashore.

Planes For Survey Work

Five Being Sent For Federal Operations In West

Ottawa.—The Royal Canadian Air Force has almost completed preparations for the photographic operations for the different government departments, the national defence department said. Ten planes are being detailed again to this work.

Five planes will be sent to the south area of Saskatchewan and Alberta as soon as the new maps are detailed. All other details agreed upon the reservation of minority rights from any method of changing the constitution.

There should be a "flexible program for amendment." By that the minister said he meant it should be possible to transfer jurisdiction from the provinces to the Dominion and from the Dominion to the provinces without obtaining the consent of all the provincial legislatures.

The presentation of unity presented a challenge to all public men and the voices in the present system were not mercenary of eradication.

Suggestion For Flag

Ottawa.—Grey Owl, Indian naturalist, on a speaking tour, said he thought Canada should have a flag of her own. "I think that two heaves of the left, and one heave of the right, representing the nine provinces, is a fitting design for the Dominion's flag," he said.

The British Budget

LONDON.—Prime Minister Chamberlain's session to inform British policy on foreign and domestic questions. Although nothing radical was done in the budget, the new development of conversations with Great Britain.

Power Export

Opposition To Power Export Licenses Shown

Ottawa.—Threats, taunts, challenges and open debate from Premier Hepburn of Ontario led to a reversal of policy by the Mackenzie King government over power export licenses. It was charged in the House of Commons that the Mackenzie King government, leader of the Ontario Conservative party, in a fighting speech that featured the opening of the long-awaited power debate, the Ontario leader who was defeated in the provincial elections came out definitely against exportation of power. He charged the government with evading its responsibilities by transferring from itself to parliament the obligation of passing on applications for power export licenses.

Prime Minister Mackenzie King replied the debate by proposing new reading of the government bill which would cloth parliament with power to pass on export applications. He said eventually it might be necessary to establish a utilities commission, patterned along the lines of the proposed transmission commission, to handle such subjects as power export licenses.

The role of the Ontario Premier had nothing to do with the government's power policy. Mr. King declared, claiming it was based on two years' experience in Quebec, which were received before Premier Hepburn applied last November.

He taunted the prime minister in an effort to find out how he would vote on the power export bill, which embodying Premier Hepburn's application. Each time there was reply.

Exportation of power was a political, even an international, policy and should not depend on a private bill, the Ontario Conservative declared. He said an issue of such magnitude should have the leadership of the government, evading its responsibilities, was "riding behind the private bill" and running for cover.

Mr. Hon. R. B. Bennett, Conservative leader, asked why a government should be left to the caprice of a subject like power exportation. It was incredible that so vital a subject should be left to the caprice of a private bill, he said.

Private legislation, such as the government legislation, envisioned, was sure to be defeated, Mr. Bennett declared. Lobbyists had operated in the past and they would operate under this legislation.

Mr. Bennett continued, "a private member cannot introduce a bill to usurp the function of the government and provide for the export of the life of the country's industry." He doubted the country would be able to resist the pressure which affected government revenues such as inspection costs.

Mr. Bennett joined other Conservatives in opposing any power exports but he promised to elaborate his views on this phase later.

Mr. Bennett joined other Conservatives in opposing any power exports but he promised to elaborate his views on this phase later.

A New Mining Town

Population In Zebulias Area On Pacific Coast Is Growing

British Columbia's newest gold-mining "boom" town is rising to the top of the rocky terrain of Vancouver Island's west coast.

A cluster of frame buildings already has been set up along the town's only street, now knee-deep in mud. Beyond this tent and shack settlement the hills, housing 375 men and six women who have come to stake gold claims or work on mining developments.

Three restaurants and a 16-room hotel have been equipped to take care of the influx of prospectors and job-hunters, arriving on ships that call three times a month to establish the only contact with the outside world.

Two more hotels are under construction. A beer-parlor license has been granted for the rising settlement. A post office and a mining recorder's office have been established, and since the gold hunters started arriving in a procession that started in 1935 and gained momentum during the last few months of 1937.

As yet there is no church, no dance halls.

In a radius of 15 miles over hills six-foot deep with snow between 600 and 1,200 claims have been staked. Ten major developments are being worked.

The steamer Maquina has been unloading from 30 to 75 passengers on its three-monthly runs. The mine approach only within a quarter of a mile of shore. There passengers and freight are transferred to a scow which brings them to the shore of land. Passengers are carried from scow by men who wade out from scow in hip-high rubber boots.

Mining properties are mostly along the Zebulias river which courses inland from Zebulias to the west coast. Gold values have been high in certain instances but Government reports of inspection of samples have been guarded.

Yields From Barley

The Production Of Barley In Arid Regions Of The Prairie Provinces

Barley production in the more arid regions of the Prairie Provinces is extremely limited because the low yields often obtained, even in fairly normal seasons, have discouraged production. These poor results are frequently ascribed to the sowing of an unsuitable variety, late in the season, or at all, when these conditions are rectified, good results are usually obtained.

Trebi, Hanchen, and Regal are the most suitable varieties for the arid regions. Trebi is a rough-went, six-rowed, high yielding variety, while Hanchen is a regular six-rowed variety that yields almost as well as Trebi. Regal is a smooth-went, six-rowed variety that is somewhat inferior in yield to the above varieties. Despite its lower yield, this variety is preferred by many because of the low straw the may be fed without any danger of the awns lodging in the eyes, mouths or throats of the live stock. Newell, Rex and San Barba are newer, smooth-went varieties that show considerable promise, and one of these may replace Regal in the near future.

The variety chosen should be sown early in the spring so that it will be pretty well matured before the extremely hot weather of mid-summer occurs. Even with this precaution, the crop will fail in a great many years unless it is seeded on summer-fallow.

It should be clearly recognized that the climate of this area is unsuitable for the production of malted barley, and consequently the grower cannot expect to obtain market grades if he wishes to sell his crop. It is not suggested, however, that barley be grown as a cash crop but rather that it be grown on a small acreage to augment the farm food supply.

An Unusual Honor

The Government of Canada, Lord Tweedsmuir, has already had a National Park named after him. Now comes a minor but still an unusual honor. A permanent camp for Boy Scouts in the Maritime Provinces has been established on Prince Edward Island, and with his permission has been named "Camp Buchanan". The camp site is a gift of the Lieutenant-Governor to the movement.

Employer: "Yes, I advertised for a strong boy. Do you think you will suit?"

Applicant: "Well, I just finished thrashing three other applicants out in the passage."

No. 10 Downing street, where the British Premier lives, is a modest kind of 44 room.

For Compulsory Voting

Options Expressed That It Would Be A Desirable Thing For Canada

Senator Norman Lamont, National Liberal organizer, speaking from intimate personal experience with elections recently said that he believed compulsory voting had become desirable for Canada. In Nova Scotia, that staunch Conservative newspaper, the Halifax Herald, said that compulsory voting was vital for Canada. The Herald, like Senator Lamont, was preaching more honest elections.

But no law or system that ever has ever quite prevailed completely against human weakness or folly, and none probably ever will. Yet it may be, regarding the matter from a purely practical standpoint, and not expecting too much from it, that compulsory voting would be good for our democracy.

One of the weaknesses of democracy is in the failure of so many citizens to take anything of an active part in elections, or even to vote. Nor are those citizens of a class whose votes would matter little, yet vote. Too often, on the contrary, they comprise the people known as those with a "take in the community" of all the national issues.

It might be a gain if citizens of this class, presumably knowing nothing of the political issues are about, or at least capable of knowing, were compelled to vote. This difficulty, and its removal, is in their best interest in political affairs, this in itself being a gain. There is something else. Every election, parties, companies, and the heavy cost of "getting out the vote."

Under a compulsory voting system, this difficulty, and its removal, necessitating less heavy demands by parties for campaign contributions, and the cost of the election registered their votes—Ottawa Journal.

An Easy Method

Health Officer Tells How Anyone Can Pasteurize Milk

City folk, especially with children, who spend holidays in cottages or camps near the water, are often troubled by finding unable to purchase pasteurized milk like the family drinks at home. There is a safe, easy way to pasteurize milk. It is as simple as right in your cottage kitchen, or even at the back of the trailer.

For the third successive year average values of occupied farm lands in Canada was \$21 an acre, the Dominion Bureau of Statistics reported in 1937 survey.

The average value includes improved and unimproved land, together with dwelling houses, barns, and all other farm buildings. Average land values in Canada have been declining since 1928, when they were \$28 an acre. Low of \$25 an acre was reached in 1934 and an increase to \$21 an acre took place in 1934. Since 1934 they have remained at that level.

Increases in average per-acre land values in 1937 were reported in Prince Edward Island, Quebec, Ontario, and Manitoba, but these were offset by decreases in Nova Scotia, New Brunswick and British Columbia. Saskatchewan and Alberta values remained unchanged.

In the second recipe the milk is brought to the boiling point, 212 degrees, then may be cooled and used immediately. This is a safe method of pasteurization for families lacking a thermometer, but the advantage is that the milk will have a slight flavor of being "cooked."

Time Is Vital Element

William S. Morrison, Scottish member of the British government, said considerable when he pointed out in parliament that "if consultation fails, our people, by then recruited, are in a position to make a difficult and dangerous for any dictator to attack us." In the growingly critical situation in Europe, time is the vital element.

Made A Good Guess

Jonathan Swift not only mentioned the two moons of Mars long before they were discovered, but said, "The innkeeper is distant from the centre of the primary planet exactly three of its diameters, and the outermost five," which was surprisingly accurate.

The trouble is those who are wrong but think they are right feel just as superior as do.

MANITOBA AGAIN WINS COTTED CURLING TROPHY

Skip Abo Gowanlock and his rink of crack curlers from Glenora, Manitoba, captured the Macdonald's Brier Tankard by scoring nine straight victories over teams representing the other provinces of the Dominion. This is the eighth time in twelve years that the Tankard has travelled to Manitoba, and the picture above shows the team which carried the province to victory this year. Skip Gowanlock, E. R. McKnight (lead), W. D. McKnight (second), and C. E. Cartmell (third).

Egg-Grading in Canada

Great Change Seen In Product During Recent Years

Canadian, on the average, each eat about 23 dozen eggs per year. This consumption is among the highest of the countries of the world. One reason for this undoubtedly is that Canadian eggs are carefully graded according to Dominion Government regulations and the merchandising of eggs is controlled and supervised from producer to consumer.

The eggs available at the retail stores of Canada today are a distinctly different product from those which were commonly offered for sale 15 to 20 years ago. Improved production methods, better handling and quicker marketing all have been instrumental in bringing about this improvement. Of greatest significance, however, has been a system of egg grading which for 15 years has required that the purchase and sale of all eggs in Canada be conducted on a basis of quality grades.

All eggs sold in Canadian retail stores are required to be graded and identified with the grade name. There are three main quality grades known as—Grade A, Grade B, Grade C. Grade A eggs are sold in three weights, Grade A Large, Grade A Medium, Grade A Petite. The quality is the same in all three weights.

Value Of Farm Lands

Survey Shows Average In Canada Is \$21 An Acre

For the third successive year average values of occupied farm lands in Canada was \$21 an acre, the Dominion Bureau of Statistics reported in 1937 survey.

The average value includes improved and unimproved land, together with dwelling houses, barns, and all other farm buildings. Average land values in Canada have been declining since 1928, when they were \$28 an acre. Low of \$25 an acre was reached in 1934 and an increase to \$21 an acre took place in 1934. Since 1934 they have remained at that level.

Increases in average per-acre land values in 1937 were reported in Prince Edward Island, Quebec, Ontario, and Manitoba, but these were offset by decreases in Nova Scotia, New Brunswick and British Columbia. Saskatchewan and Alberta values remained unchanged.

Has Particular Job

English Girl Has To Find Diet For Rare Birds

Dark, 21-year-old Delays Webb is leaving London for the wilds for the second time within a year. It was last July that she returned from an 8,000-mile trek through uncharted country in West Africa. On that trip she went down with malaria and by between life and death for days.

Now she is accompanying her uncle on a six-month expedition of the Andes to study the habits of certain birds. She is to find a diet for birds which have been accustomed to feeding only on necessity. She has to find a diet for birds which have been accustomed to feeding only on necessity. She has to find a diet for birds which have been accustomed to feeding only on necessity.

She has to find a diet for birds which have been accustomed to feeding only on necessity. She has to find a diet for birds which have been accustomed to feeding only on necessity. She has to find a diet for birds which have been accustomed to feeding only on necessity.

Victorian Order Of Nurses

Seven New Centres Opened In Canada Since Last July

Miss Elizabeth Smither, superintendent of the Victorian Order of Nurses in Canada, expressed enthusiasm at progress in the order, she observed during a Western tour. Seven new centres, serving 60,000 more people than formerly, have been opened in Canada since July.

Three new centres in Eastern Canada may be added soon to the 35 centres now in operation. Of these centres which serve 750,000 persons, only a small locality showed a deficit in operating expenses in its annual report. Three hundred and forty nurses, chosen for their personality, good health and love of the work, do much to further the advancement of this order. Summoned at all hours and to all parts of the city and country, these nurses are good car-drivers and are handy with a shovel, a necessary part of their equipment in the winter, said Miss Smither.

Prefers Life On Prairies

Englishman Who Went Home Decided He Likes Canada Best

Arthur Bean brought his family six thousand miles from Alberta to Middleburg, found it was too cold—and the people too cold—so now he's taking them back again. He used to live at Edmonton, near Middleburg, but 12 years ago went farming in Alberta. His wife and seven-year-old daughter in his went with him. A short time ago they returned to England, hoping to settle down. But they found all their old friends had grown up. Did not know them. They could not get a house to suit, either. And the cold "It's colder in the manufacture of paint, varnish, linoleum, and printing ink, and only to a limited extent for edible purposes and for making soap. Linseed cake, on the other hand, is readily interchangeable with other oleaceous for feeding live stock."

From the wilds of Missouri comes a young man, the definition of a farmer. Making your company feel at home when you wish they were.

Gas Masks for babies and rubber goggles for cattle are among the new products being manufactured abroad.

Cordelia, Ga., has a replica of an apple made of steel and concrete, 96 feet in circumference, as a monument in its public square. The "apple" weighs 5,000 pounds and is mounted on a base eight feet high.

Wolves invaded the suburbs of Sofia, Bulgaria, during a storm.

Budgeting The Farm Income

Careful Calculation May Save Worry In The Future

A budget of farm expenditure. To plan to advance one must have some idea what he will have to spend. A Western grain farmer's income is an uncertain quantity, but the greater the hazard the louder the call for cautious planning.

Even with a fixed income, budgeting is still a problem for one never knows what unexpected expenses may crop up. It is necessary, therefore, the other, emphasizes the need for careful calculation. Headaches from planning spare heartaches afterwards.

It is so easy when thinking loosely in round numbers to exaggerate income and to underestimate outgo. With a pad and pencil one gets down to brass tacks.

It helps greatly in budgeting to have several years' accounts as a guide. From these one may gauge his average net, what is more to the point, his highest annual outlay for such items as labour, repairs, blacksmith bills, interest, taxes, insurance and the like. Then, to be on the safe side, or without them if none are available, suppose we proceed as follows:

List the assured items of income, if any, and total these. Below, list the probable items of income, as from wheat, oats, barley, cream, butter, eggs and vegetables. Total these. Now add the two totals and see what they come up to. Then, to be on the safe side, or without them if none are available, suppose we proceed as follows:

On another sheet list the fairly doubtful items of income, such as taxes, interest, insurance premiums, blacksmith bills, repairs, groceries and the like. Total these. Now add the two totals and see what they come up to. Then, to be on the safe side, or without them if none are available, suppose we proceed as follows:

On another sheet list the fairly doubtful items of income, such as taxes, interest, insurance premiums, blacksmith bills, repairs, groceries and the like. Total these. LOCAL NEWS

Mr. John Surochan of Delta will
conduct services at the Carbon United
Church on Sunday, March 20th. Rev.
W. H. McDannold will take the ser-
vice at Delta on this date.

Mr. and Mrs. John Mason spent a
few days in town this week looking
after the interests of the Baird estate.

Mr. and Mrs. W. Poxon and Law-
rence of Drumheller spent Tuesday in
Carbon.

The government grader went thru
town on Tuesday and smoothed out
the road leading to the two main high-
ways.

Ross Thorburn was a Calgary visit-
or the latter part of last week.
The Deputy Minister of Transport
has announced that there will be no
increase in the fee for battery-operated
radios.

Mr. and Mrs. A. F. McKibbin spent
last Thursday and Friday in Calgary.

Stuart Hay motored to Calgary on
Monday.

Mrs. J. C. Spence returned to Cal-
gary last Thursday after spending a
few days visiting in town.

Mrs. Robertson returned on Friday
from a visit with relatives at Three
Hills.

Claud Cressman of the Carbon Auto
service was a business visitor to Cal-
gary on Wednesday last.

Mrs. M. J. Elliott is spending a few
days visiting with her sister in Cal-
gary.

Mrs. Jas. Ramsay of Calgary ar-
rived last week and is spending a few
days in town.

Harold Edwards of Calgary spent
the weekend in town and incidentally
ran foul of the law, when together
with Cy Poxon and Otto Schliker they
were remanded by Const. Shaw of
the R.C.M.P. for shooting within the
Village limits.

BOY SCOUT NOTES

BY THE S. M.

BOY SCOUTS

Due to certain circumstances, we
have been unable to call another meet-
ing, but will do so at the first pos-
sible opportunity. The place and time
of the next meeting will be announced
in this column.

BOY SCOUTS

We are very sorry to be losing Ray-
mond and Hans Herbert, who are go-
ing to live at Hinton, Alberta. They
have both done well in the troop and
will be missed by all of us. Neverthe-
less, we wish them the very best of
luck in their new sphere and add that
if it is possible for them to be in this
district again they will find a royal
welcome from their Brother Scouts.

FACTS TO THOSE WHO
CONTEMPLATE SOWING OF
NEW WHEAT VARIETIES

In view of the near approach of
seeding it is desirable for the farm-
ers' information to enable them to
make the necessary arrangements for
their seed requirements, that a pre-
liminary statement with regard to the
results of the experimental shipments
of commercial grain of the Thatcher
and Coronation varieties of wheat to
the United Kingdom, should be made.
Information received so far would
indicate that the grading of Thatcher
wheat as No. One Manitoba Northern
has been confirmed provided it other-
wise qualifies in other words, that
where wheat will be recognized as be-
ing "equal to Manitoba" in milling qual-
ity.

In regard to Coronation wheat the
situation, however, is not so clear and
while a final pronouncement in this
connection can not be made until after
the return of Dr. Godkes from over-
seas and the meeting of the Associa-
tion Committee on Grain Research,
which takes place in the first week of
April, the preliminary indications are
that Coronation wheat will probably
not be licensed and that it will be
graded no higher than No. Three Mani-
toba Northern.

BUY IN CARBON

WE OWE YOU MONEY

Payable in CASH—ON DEMAND

★ ★

If yours is one of the 4,740,000 accounts in which
people have dollars on deposit in Canada's
chartered banks, your bank owes you money.

That money does not belong to The People, the
government, the nation, or to your neighbour. It
is YOURS.

If you are a savings depositor, the bank, in
addition to providing safety, pays you interest on
YOUR MONEY just as a borrower pays interest
to the bank, for

**WHAT IS A BANK?—It is an institution organized to
receive deposits and to make loans; that is the
mechanical description. But it is a much more
human place than that; it means much more to YOU.**

Your bank is a place where
you can deposit money for your-
self and your family, with every
assurance that you can get it
back whenever you call for it—
in full and with interest.

The bank's books show your
deposit as a sum of money you
own to your bank—must pay to you
when you ask for it—a liability
of the bank.

Your bank is, too, a place
where persons worthy of credit
may borrow for business or other
legitimate purposes.
The borrower must be worthy.
By worthy, we mean that because
of his record for honesty and
integrity, his business ability,
and the things he owes, he may
be counted on with reasonable
certainty to be willing and able
to repay. We MUST know that
he is a "good risk", for we
MUST keep YOUR deposit and those
of all other depositors SAFE,
against the day you call for
what WE OWE YOU.

As a depositor, you are our
creditor; we have to be pre-
pared to pay you in full. There-
fore we must do our utmost to
collect in full as much as we
loan, plus our costs of operation.
We pay interest for deposits
and charge interest on loans.
You will be surprised when we
tell you the range of our costs,
the smallness of our margin of
profit.

Bank deposits are the money
of certain people — not "The
People". There is the substance
of Canadian banking as plain as
a pikestaff. You have known it
for a long time; you can let
others know just what money
it is they speak of, when they
talk about the community's
claim to bank deposits.

More than 4,740,000 people in
Canada—equal to more than 42
per cent. of Canada's population
—have "money in the bank"—
deposits lodged with Canada's
chartered banks. Of these no
fewer than 1,081,000 are savings

depositors receiving interest on
their money.
Canada's chartered banks
have paid over \$397,000,000 in
interest on deposits in the last
ten fiscal years.

Savings of the Canadian
people, deposited in the char-
tered banks, now total nearly
\$1,584,000,000—the average
savings deposit being \$387.

There are about 660,000 cur-
rent accounts of individuals and
corporations totalling \$679,000,
000 in Canada's chartered banks.

It takes the equivalent of nearly
three average savings accounts to
make one loan of \$1,000.

And it takes the net profits, over
and above the costs of doing busi-
ness, on scores of loans of \$1,000
each for a year, to make up the
loss of one single loan of \$1,000.

This shows what care the
banks must take in lending. If
the depositor's funds are to be
safeguarded, for the net profits
of banks are less than one-half
of one per cent. on their total
assets.

Without deposits a bank
could not long continue in
business. YOUR MONEY re-
mains on deposit in the bank
ONLY AT YOUR WILL; and
if you think the bank is lending
recklessly, you will draw it out.

The bank must always keep
itself in a position to pay you
your deposit, in full, in cash,
whenever you choose to call for
it.
Canada's chartered banks
realize that the establishing of
your home, the happiness of
your family, the education of
your sons and daughters, their
start in life, their progress in
business, your provisions for a
rainy day, your peace of mind
in the twilight of life, may de-
pend largely upon this money—
money you have deposited in a
bank—money YOUR BANK
OWES TO YOU.

THE CHARTERED BANKS
OF CANADA

Your local branch bank manager will be glad to talk banking with
you. He will be glad to answer your questions from the
standpoint of his own experience. The next article in this
series will appear in this newspaper. Watch for it.
